

To Be Corrected in the Video

1. Registration Form

- a. Select country from country dropdown.
- b. Populate the State field with states from the selected country.
- c. Select State from State dropdown.

2. Phone Number

Add space between Phone and Number. It should be **Phone Number**, not PhoneNumber).

3. Country Dialing Code

Automatically add country dialing code to phone number field (preceding with + sign) based on the selected country, then user will add his phone number after the country dialing code.

4. Whatsapp Number

Change first letter of whatsapp to Uppercase letter.

5. Username

Change User ID to Username.

6. Phone Number Validation

One phone number cannot be used to register another account to prevent multiple account creation by same person.

7. Whatsapp Number Validation

One Whatsapp number cannot be used to register another account to prevent multiple account creation by same person.

8. Email Address Validation

One email address cannot be used to register another account to prevent multiple account creation by same person.

9. Verification Email Message

10. eWallet Registration Button Text

Change the text to look exactly like this eWallet Registration instead of Ewallet Registration.

11. eWallet Registration Button Link

- a. On the **Verification Success** page, hide the destination url that shows on the bottom left when mouse hovers on the **eWallet Registration** button.

12. eWallet Registration Page

Pass the email and phone number the user supplied on the registration form to the appropriate fields on the eWallet Registration page so that users only have to add the **Anti-spam code** and click the **Next** button.

13. My Account Page

Add margin on the **My Account** page so the textarea borders don’t touch the extreme hedges of the page.

14. Account Details Update

When user attempts to update account details, the system will not accept email address, phone number and or whatsapp number that is stored for existing user.

15. Notification Inbox

Notification inbox display has to be formatted properly to look attractive. It must also display well on mobile devices.

16. Social Media Icons

When user clicks on any of the icons, there will be a popup window with sharing functionality instead of linking to the website. Trillion live examples on the internet.

17. Referral Contest Page

Don’t bother yourself about other things on this page. Only determine the top user by the number of referrals per month. User that referred the highest tops the list, followed by the second, etc.

Pagination: User can select number to display per page. 10, 50, etc.

Place	Username
1.	Username1
2.	Username2
.	
.	
.	
1000.	Username1000

18. Admin dashboard

There's no content for admin dashboard in your video yet.
